Summary

Experienced WordPress Web Developer with over 3 years of expertise in building responsive, optimized websites. Proficient in both front-end and back-end development, specializing in HTML, CSS, PHP, and JavaScript. I've worked extensively with page builders like Elementor, Avada, and Beaver Builder. Skilled at converting mockup designs from Figma and Adobe XD into pixel-perfect, fully responsive, high-performance websites. I focus on creating user-friendly, functional, and well-optimized web solutions.

Work Experience

WordPress Developer | GrowModo   **2023 May to 2024 November**

- Developed and customized WordPress websites using Elementor, WPBakery, Beaver Builder, Oxygen, Avada, and Divi.
- Built and optimized e-commerce stores by integrating WooCommerce and custom solutions.
- Installed and configured essential plugins, adding custom code to meet project requirements.
- Optimized website performance for speed, accessibility, and SEO best practices.
- Diagnosed and resolved website issues, ensuring smooth operation and minimal downtime.
- Worked with Squarespace, Webflow, and HubSpot CMS to develop and customize websites based on client needs.
- Created email templates and configured automation settings in Mailchimp to enhance marketing workflows.
- Used GitHub Desktop for version control and file transfers via SFTP/FTP.

Web Developer | GoCrayons   **2021 April to 2023 May**

- Led project estimation and task delegation, ensuring efficient workflow and timely project completion.
- Managed WordPress development using various page builders, including Elementor, WPBakery, Beaver Builder, Oxygen, Avada, and Divi.
- Website deployment, handling staging-to-live migrations with minimal downtime.
- Configured and managed web hosting environments (GoDaddy, HostGator, SiteGround) for optimal performance.
- Administered cPanel, SFTP, and FTP for website maintenance and security.
